2. Citations and explanations:

Reference is made to the following document:

- ✓ D1: GB 628 686 A (UNIVERSAL OIL PRODUCTS COMPANY)
2 September 1949 (1949-09-02)

The present application relates to a process for preparing butadiene and 1-butene, comprising reaction steps (A)-(G).

D1 constitutes the closest prior art and differs from the subject matter of claim 1 in that the features of steps (E)-(G), specifically the "separation of the C4 product gas stream d into a stream e1 consisting essentially of n-butane and 2-butene and a product-of-value stream e2 consisting essentially of butadiene by extractive distillation, and the feeding of stream e1 and a cycle stream g comprising essentially 1-butene and 2-butene into a distillation zone, and separation into a 1-butene-rich product-of-value stream" are not disclosed.

The objective technical problem can therefore be considered that of providing a further process for preparing butadiene.
